

ALIGNING WITH PURPOSE: SOUNDING THE NOTE OF PEACE

If we could offer future Humanity anything, is there anything of greater value than peace? In times of peace, each individual and group expands into its potential. In times of peace there is freedom from fear and a sense of security; in all areas of community there is a sense of abundance.

For us to offer peace, we must know what it is and be able to embody it. Is it found in high states of awareness? Is it sensed when one's frame of reference expands to include a larger whole? Are you aware of it when you glimpse a pattern emerging within apparent chaos? Did you feel it when last your heart opened to intuitive understanding?

In order for us to give peace, we must be dynamic expressions of peace. Our Conference will create a community of peace. The many speakers and presenters will share their methods and successes in sounding their note of peace.

At the very centre of the concept of peace is an inspiring image. It is a great being known as the Lord of the World: the being who is the Earth in all its aspects of expression. Waves of compassion stream from this being as bands of living colour. Colour and sound build to a future in which our Earth becomes a light house within our galaxy.

Are there ways for us to identify and align with this image? Is the very act of alignment with this great being the way to tune our personal note to the note of peace? Join us where hearts and minds unite.
