

A CULTURE OF LOVE

The destiny of Humanity is to live within a culture of love. It is our destiny to know love, to express love in our relationships and to create a civilization which reflects love in its institutions, creative expressions and social practices. This destiny is our birthright.

18 million years ago we emerged from our position as a human animal into the light of reflective intelligence. The human kingdom was created in a kind of Big Bang: a great cosmic experiment. We would become instruments working in the dense physical, emotional and mental worlds to create bridges of love so that all beings might evolve.

The source of the experiment was the Council Chamber in the star system of Sirius. They worked through the planet Venus. A bridge was created so that great fire devas called Solar Angels could arrive on this planet and ignite the spark of mind within the human animals. These Solar Angels became the first Spiritual Hierarchy of this planet and lived among us for the first few million years. Eventually, they trained the new humans to transcend their limitations and fill the ranks of the spiritual guides of the race.

We might imagine Venus as our wise elder sister. Her level of wisdom makes her like the soul to our Earth personality. She continues to guide and prompt the development of soul/love culture within Humanity.

Now, we have arrived at a critical juncture in the experiment. We are nearly at the point where enough individuals and groups have struggled into the light so that a major shift can occur for the whole of Humanity.

The preparation has come through the opportunities provided in the last 100 years. World suffering due to wars, greed and natural disasters has pierced the human heart. Scientific achievement has created a platform for instant global communication and education and has given us the tools to solve the problems we have created. And, in three instances, (mid-1930's, 1975, and 2000) Humanity has received direct contact with the planetary head centre, Shamballa. Each contact has increased Humanity's will to evolve.

We are now envisioning the soul/love culture which is our destiny. We are seeing our natural world as a whole inter-connected and inter-penetrating ecological system.

We know that we are stewards for the creative evolution of that system. Our science is showing us the blueprints of potential and the ways to create balances.

We are looking at each other and seeing that we are souls; that the other is our brother/sister. Knowing this, we want to share the best of ourselves as we sense the need in the other. We hear a note which is the note of our soul and we move into relationship with others because we desire to create greater harmonies with the other notes.

Beauty emerges in all fields of culture as we fulfil our destiny. Because we see it within all things, our artists bring it forth in music, drama, dance and all creative mediums.

Money becomes freed up. In fact, becomes associated with Freedom; a concept which emerges from the very heart of Sirius. Money becomes just energy which moves to any point on the planet where creative evolutionary growth is seeking to emerge. Each unit moving into light/love/consciousness has a right to draw on money to encourage the process.

Global education comes to embody a core set of values and adapted to local need. The primary value is the individual. Teachers use their own soul awareness to sense the soul pattern seeking to emerge in the life of the student. All impartation of information and techniques support this emergence of light. The student is guided to see his/her role in helping individuals and groups.

A world court inspires all components of a global justice system to see the conflict resolution as a holistic process. The justice system seeks to see what is trying to emerge as positive growth and rules in favour of what will encourage that growth. Judgements of good and bad/right and wrong are replaced by empowerments for positive change.

A New World Religion emerges from the ashes of the old religions carrying the greatest wisdom from each and the most powerful techniques for self transformation that each had to offer. This religion will be practical and based in daily and period rituals which link the individuals and groups into a larger cosmic order. Its message of love carries a vision of bringing Heaven to Earth as it promotes relationships which demonstrate love in physical, emotional and mental terms.

Finally, our destiny is to have a world government which is an improved vision of our experiment with the United Nations. It models for all local governments a culture of love and peace. It meets with hearts and minds open to a great Purpose. It stands and says, "Not my will but Thine be done". It serves to empower the Good.

Now, in the month of Gemini 2004, we stand at the doorway to this new civilization. Venus, she who guides our path of love, rules this sign and is currently in the sign of Gemini (4 April-8 August). She is moving retrograde from 17 May to 29 June which gives us the opportunity to review all of our relationships and assess how open they/we have been to love. And, on 8 June, there was a transit of Venus across the Sun; an event which happens only once every 120 years. These cosmic events are a doorway to the culture of love.

The Mayan prophesy states that on 25 July we enter the final stage leading to the end of time in 2012. The next transit of Venus across the Sun will happen in the sign of Gemini in 2012. Perhaps the time that ends is the time of preparation with all of its pain and separation. Perhaps the new time is a time in which love and soul culture blossom.

The time is right for us all to refine our visions of a culture of love. We have the power and we must work to make it real. A powerful aid is the following mantram known as the Affirmation of the Disciple:

"I am a point of light within a greater Light.

I am a strand of loving energy within the stream of
Love divine.

I am a point of sacrificial Fire, focussed within the
fiery Will of God.

And thus I stand.

I am a way by which men may achieve.

I am a source of strength, enabling them to stand.

And thus I stand.

And standing thus revolve

And tread this way the a ways of men,

And know the ways of God,

And thus I stand."
