

Masters in Medical Astrology Course

This is a 20 day course conducted over 4 intensives designed to provide the student with the diagnostic tools to pinpoint physical strengths and weaknesses, analyse potential medical conditions, and source their origins whether physical, etheric, psychological or spiritual. The nature, reality and possibility of healing will be explored and potential therapeutic treatments outlined.

The course is divided into 2 parts, Orthodox and Esoteric.

The Orthodox part of the course focuses on current astrological theory regarding correlates with physiology, anatomy, a little chemistry and commonly accepted treatments medicinal, surgical, dietary, with vitamin & minerals, homeopathic, herbal etc

The Esoteric part of the course uses Alice Bailey's Esoteric Healing as an applied astrological guide to unlocking the inner anatomy (chakras, subtle bodies) of a human being to understand the nature of the source of ailments and cultivated strengths. The prime purpose of this, is to produce self-understanding as to the nature of any given condition plus where relevant, the potential to use a variety of meditative and energetic techniques combined with orthodox techniques that may help to alleviate the condition.

It is **not** necessary to buy the texts except for background and greater context. The manuals I've written will cover most of the material. Bailey's books are the more useful for context.

Homework with written feedback will be given to reinforce learning at the intensives.
